### How to use the image library

The MediaClubSouthAfrica.com image library is a public service containing some 2 000 photos of people and places across South Africa.

The images are available in low resolution (50KB to 200KB in size) and in high, print-ready resolution (1MB to over 10MB in size) – free of any charge.

To access the image library and begin downloading images, you first have to [register](#) with the site. Registration is quick and easy, and allows you to immediately log in – no waiting for confirmation emails required.

Once you have logged in, you can browse the thumbnails of the photos. To see a larger, low-resolution version of the photo, click on the thumbnail.

Do download the high-resolution version, right-click on "Download high-res image" below the thumbnail and select "Save target as" ("Save link as" in Firefox) to copy the photo onto your computer.

If you republish the photos on the web or in print you are obliged to credit both the photographer and MediaClubSouthAfrica.com. On the web, this credit must include a link to MediaClubSouthAfrica.com.

See the terms and conditions of using the image library below.
